Introducing eFORMz Printing Software Solution

Toshiba is pleased to introduce the latest addition to its software solutions portfolio with eFORMz. This powerful forms and label printing solution is offered in partnership with our newest solutions partner, MiniSoft and enables formatting, personalizing and delivering application output. eFORMz takes standard print output from a software application system and transforms it into intuitive, functional forms that can be distributed via print, email, or sent to an archive system.

Key Features of eFORMz

- Replace pre-printed forms – eFORMz can be used to generate a variety of business forms and documents including purchase orders, integrated packing lists, and checks
- Ease of use – eFORMz comes with a Designer that can be used to easily create form and label layouts
- Integration with Toshiba’s Two-sided Thermal Printer – eFORMz supports the Toshiba’s Two-Sided Direct Thermal (DB-EA4D-QM-R) label printer and connect directly to Linux, HP-UX or iSeries servers without a Windows server
- Duplex Packing Slips – The duplex pack slip label is a single label that serves as the shipping label and packing list thus saving on media consumption
- Promotional messaging or special offers – eFORMz can utilize the white space on a label to sell more by delivering a more personalized customer experience
- High quality labels in full color – eFORMz is compatible with Toshiba’s e-STUDIO 2550c and 5055c series MFPs (Utilizing the bypass tray) for full color label printing
